Brief overview

Additional features during the event:
destination
and *inheritance*

Search tool

Filtering tool

Export tool

Brief overview

Contributions/Documents containing proposals are created via CPI (tool used by delegates to create the skeleton of their proposals), **retrieved or recreated in DPM** (internal tool for DocsControl) **and verified via DHV** before being posted on the web.

As soon as proposals are published, they are made available on PMS.

In PMS, proposals can be searched, sorted by document numbers, by references, by types of documents (white docs, DTs, White series of texts, Blue series, Pink series), etc. Proposals can be **retrieved in any of the six languages,** and one can look for their **"inheritance".**

Proposal references

Mapping to the Collection of basic texts

Access to prop/doc in different languages or inheritance

Additional features during PP-22 : *destination*

As soon as the first Plenary (PL/1) approves draft structure (DT/2 – designating the Committees and Working Group of the Plenary) and the allocation of documents (DT/3) a new column "destination" will appear in PMS (see ex. below from PP-18).

Properties

📄 R4/164/2

Inheritance

📄 EUR/48A2/28 📄 ACP/64A1/3 📄 USA/18A4/1 📄 ARB/72A1/2 📄 AFCP/55A6/1 ⎤ Contributions used as the basis to build the final text which will be included in the draft Final Acts

   ↱ 📄 COM6/64/1   **Green** icon for DTs

      ↱ 📄 COM6/125/2   **Black with WS** icon for series of texts

         ↱ 📄 B9/134/2   **Blue icon** for the First reading

           ↱ 📄 **R4/164/2**   **Pink** icon for the second reading

Additional features during PP-22: *inheritance*

During the event, under the column "properties" , delegates can:

- retrieve a proposal or an entire document in the selected language;

- Track the status of texts/proposals by viewing the "inheritance" of a text, from its extraction from an original contribution to its evolution during the event via DTs, White series of texts, Blue series of texts, Pink series of texts.

Search tool: *search full text*

The search can be processed by word(s) and the result will appear in the table, as in the example below

Export features

These two features can be used: either for all proposals, or on **search** or **filter** results

It exports a Word document containing:
- ✓ A summary table
- ✓ The complete text of proposals

It exports a Word document containing:
- ✓ A summary table only
- ✓ The link to proposals on the website

Thank you!
