European Common Proposal (ECP)

Definition of an European Common Proposal (ECP)

An ECP is a multi-country proposal to which the Working Procedures for CEPT Coordination apply.

…

As a general guideline an ECP would not be approved by the responsible Com-ITU entity unless there were at least 10 CEPT members indicating their intention to co-sign it, and not more than 6 opposing the proposal going forward as an ECP.

…

Any CEPT Member which is obliged to voice objections or submit alternative proposals to an ECP should inform the responsible Com-ITU entity of its intentions and should, nevertheless, cooperate with the other CEPT Members during ITU meetings to develop a common consensus.
